In the background, the city of Mecca is visible with its numerous buildings and minarets. The sky is dark, suggesting it is nighttime.

MY DREAM VACATION

Saudi Arabia

Saudi Arabia

Saudi Arabia is a vast and strategically located country in the Middle East, occupying the majority of the Arabian Peninsula. It is surrounded by Jordan and Iraq to the north, Kuwait to the northeast, Qatar, Bahrain, and the United Arab Emirates to the east, Oman to the southeast, and Yemen to the south.

Saudi Arabia's diverse geography includes deserts, mountains, and coastal areas along the Red Sea and the Arabian Gulf. The Rub' al Khali, or Empty Quarter, is one of the world's largest deserts, dominating the southern part of the country.

The climate varies from scorching hot in the desert regions, with temperatures soaring above 120°F (49°C) in the summer, to more moderate along the coasts. Coastal areas experience high humidity, while the interior faces arid and extreme desert conditions.

2034 FIFA World Cup. That's something I surely want to witness while being there!
